Monroe County Health Department Community Health Improvement Plan Released

The Community Health Improvement Plan (CHIP) is a local health plan to address health conditions that impact residents. The main goal is to work with the community to improve the county's health in priority areas identified by Monroe County residents.

The three health priorities identified are:

1. Mental health
2. Alcohol and other drug misuse
3. Safe and affordable housing

To view the full CHIP report, visit the Resources tab on the Monroe County Health Department webpage at www.co.monroe.wi.us

This document serves as a plan of action for the entire community. Each health priority has a broad goal followed by objectives and a list of possible strategies to address the issue. Anyone interested in improving the health of Monroe County is encouraged to use this plan as a guide and to contact us with interest in joining workgroups to address these issues.

Follow the Monroe County Health Department [Facebook](#) and [Instagram](#) pages for more.
